## DETAILED ACTION

### ***Election/Restrictions***

1. This application contains claims 1-23 directed to the following patentably distinct species of the claimed invention:
  - a) Group I: figures 4, 5A, 5B, 6, 7A-7E and 8A-8E: The structure of a wavelength filter which includes two lattice filters.
  - b) Group II: figures 9A and 9B: The structure of a wavelength filter, which includes three lattice filters.
  - c) Group III: figures 10 and 11: The structure of an optical device where two wavelength filters are employed; each wavelength filter includes two lattice filters.
  - d) Group IV: figures 12 and 13: The structure of an optical device where two wavelength filters are employed; each wavelength filter includes three lattice filters.
  - e) Group V: figure 14: The structure of a variable wavelength filter includes two lattice filters, in which the electrodes are made of a material such as ITO (indium-tin oxide) and provided on the surfaces that reflect light and on the surfaces that transmit light.
  - f) Group VI: figure 15: The structure of a variable wavelength filter includes two lattice filters, in which the electrodes are formed on planes that do not cross the optical axis.

- g) Group VII: figure 16: The structure of a variable wavelength filter includes two lattice filters, in which the electrodes are made of a material such as ITO (indium-tin oxide) and provided only on the light reflection sides of the substances.
- h) Group VIII: figure 17: The structure of a variable wavelength filter includes two lattice filters, in which the electrodes are provided for both of the two lattice filters and common to the two lattice filters.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.
3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
